

Mossy Mug

Coffee Shop UI — Project Reference

“Pull up a chair. Stay a while.”

Type	Personal Portfolio + UI/UX Learning Project
Tools	Figma → HTML + CSS
Stack	HTML5, CSS3 (Flexbox + Media Queries)
Repo	GitHub — independent project

Generated as a living reference — update as the project evolves.

PROJECT ROADMAP

Phase 1	UX Research & Planning	COMPLETE
	• Define target users and their needs	
	• Establish brand identity — name, palette, tone, typography	
	• Map page sections and content hierarchy	
	• Catch and resolve brand-visual mismatches before building	
Phase 2	Figma Wireframe (Lo-fi)	NEXT
	• Open Figma, create mossy-mug file, add Wireframe page	
	• Sketch layout with rectangles and placeholder text only	
	• No colors or fonts yet — just structure and spacing	
	• Go section by section: Hero → Menu → Cards → About → Footer	
Phase 3	Figma Hi-fi Design	UPCOMING
	• Apply the full brand palette and typography	
	• Design real components: nav, menu cards, CTA buttons	
	• Use Auto Layout in Figma for clean, scalable components	
	• Export assets and note spacing values for handoff to code	
Phase 4	HTML + CSS Structure	UPCOMING
	• Build semantic HTML matching your Figma layout	
	• Apply CSS using the exact hex values from the brand palette	
	• Structure each section as its own clearly named block	
Phase 5	Responsive CSS	UPCOMING
	• Add Flexbox layout for cards and nav	
	• Write media queries for tablet (900px) and mobile (600px)	
	• Test on real device sizes using browser developer tools	
Phase 6	Polish & Testing	UPCOMING
	• Cross-device testing — desktop, tablet, mobile	
	• Check spacing consistency and visual hierarchy	
	• Final GitHub commit and README update	
	• LinkedIn post documenting the full project	

Brand Name & Tagline

Mossy Mug	"Pull up a chair. Stay a while."
-----------	----------------------------------

Color Palette

Moss Green	#4A7C59	Primary — headers, nav, icons
Sage	#7AAE8A	Secondary green — hover states, accents
Warm Beige	#F5ECD7	Page background
Off White	#FAF7F2	Card surfaces, inner containers
Rust Brown ✧	#A0522D	ACCENT — CTAs, prices, highlights
Deep Charcoal	#2C2C2A	All body text

Typography — all free on Google Fonts

Role	Font	Usage
Display / Logo	Playfair Display	Brand name, hero heading
Section headings	Lora	Warm serif for section titles
Body / UI text	DM Sans	All readable UI text
Labels / Prices	DM Sans Medium	Rust color, slight letter spacing

Brand Tone

Unhurried	Welcoming	Unpretentious	Quietly aesthetic	Affordable, always
-----------	-----------	---------------	-------------------	--------------------

USER PERSONAS

These four personas guide every design decision. When unsure about a layout choice, ask: does this serve at least one of these users?

The Studier	Needs a quiet corner, good wifi, stays 3 hours with one latte. Cares about: seating availability, wifi info, affordable drinks.
The Crew	Group of friends post-class. Wants space, snacks, no pressure to leave. Cares about: group seating, food options, relaxed vibe.
The First-Timer	Found it online, wants to know the menu and vibe before arriving. Cares about: clear menu, prices visible, atmosphere photos.
The Regular	Knows their order. Just wants it fast and a familiar seat. Cares about: quick order path, consistency, recognizable layout.

PAGE SECTIONS TO BUILD

Hero	Brand name, tagline, 'Order Now' CTA. Full-width. Sets the whole mood on first scroll.
Menu categories	Hot drinks, cold drinks, bites. Tabbed or scrollable. Easy to scan quickly.
Item cards	Name, short description, price (rust color), order button. Consistent grid layout.
About the space	Why Mossy Mug exists. Short, warm, honest copy. Photo + text layout.
Find us	Opening hours, location, simple address block. No clutter.
Footer	Quick nav links, social icons, small logo. Keep it minimal.

KEY DESIGN PRINCIPLES

Design first, code second.	Always complete the Figma phase before writing a single line of HTML. The design is your blueprint.
White space is doing work.	For a calm, unhurried brand, a cluttered layout contradicts the feeling. When unsure — remove, don't add.
Visuals set expectations.	If the website looks expensive, visitors assume it is. Every design decision communicates price point and personality.
Execution over originality.	A common palette done well beats a unique palette done messily. Focus on spacing, hierarchy, and consistency.

Design for your persona.

When stuck on a decision, ask: does this serve The First-Timer? The Studier? Keep it if yes — question it if no.

Commit per phase.

Each GitHub commit should match a project milestone. Your commit history tells the story of how you built it.
